Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/22/07 has been entered.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Safrit (3625029).

Safrit (3625029) teaches the invention substantially as claimed including a boxer short type article having a trunk part (11) being made of a loose fitting textile and leg parts (14) made of a form-fitting textile. Note that the article is circularly knit. Note the spandex or elastic yarn (17). Note the welt (13) and waistband (10). Safrit et al (3625029) also sets forth the method as claimed including the steps of circular knitting a bottom welt (13) a waistband (10), knitting a leg part with a yarn (17) having a higher elasticity than the elasticity of the yarn used for knitting the trunk (11) portion. Note the plating shown in figure 2. However, the line of demarcation

between the loose fitting textile part and the form-fitting part, as seen in figure 1, is at a bottom of the inseam area rather passing through an upper part of the inseam. It would have been obvious at the time the invention was made to provide the location of the line between the loose fitting upper part garment and the tighter fitting lower part passing through an upper part of the inseam in order to provide the additional support of the tighter fitting portion at a higher point on the wearer's body.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to /Danny Worrell/ whose telephone number is 571/272-4997. The examiner can normally be reached on MONDAY-THURSDAY.
